

Waste Electrical & Electronic Equipment (WEEE)  
Supplier Compliance Statement

Pursuant to the Waste Electrical and Electronic Equipment (WEEE) Directive 2012/19/EU of July 2012 of the European Parliament and the Council of the European Union (EU), the producers of electronic and electrical equipment (EEE) are required to manage and finance the collection, treatment, reuse, recycling and disposal of relevant EEE products. The goal of this directive is to minimize the volume of electrical and electronic waste disposal and to encourage re-use and recycling at EEE product end of life.

R&D Microwaves LLC complies with the EU WEEE Directive, as applicable, and requires all EEE importers of R&D Microwaves LLC products to the EU comply with all applicable EU and member state laws and regulations.

If applicable, the below symbol will feature on the product or on its packaging indicating that the product must not be disposed of with normal household waste.

It is the end user's responsibility to dispose of the product to a designated collection point for the recycling or disposal of EEE. For a list of designated EEE recycling or disposal centers please contact the sales department at [sales@rdmicrowaves.com](mailto:sales@rdmicrowaves.com) for more information.

In addition, R&D Microwaves LLC offers a 'take-back' for end-of-life equipment by a return merchandise authorization (RMA). Please contact us for more information.

This certificate may be relied upon that all products manufactured and supplied by R&D Microwaves LLC are **compliant** with the current revision of the WEEE directive referenced above.

This certification is valid unless superseded by a revised certification of a later date and revision.
