Your supplier of choice for Limiting Amplifiers

PMI offers a wide variety of low-cost, highly reliable Limiting Amplifier products that are designed to provide constant output power over a wide input dynamic range. Custom units can be designed and built to your specifications.

Features:

- Narrow to Multi Octave Band, up to 20 GHz
- Ideal for front-end receiver applications in electronic warfare and military communications systems
- Low VSWR and excellent flatness
- Reverse voltage protection
- Small Size & Standardized Packaging
- Unique Serial Number and Date Codes with each unit
- Swept Data with each unit, supplied with every delivery

Options:

- Custom frequency ranges and limited output levels available
- Surface Mount or Connectorized
- Form, Fit & Function Designs
- Various Connector Options
- Operating temperature ranges from -55 °C to +85 °C
- Hermetic Sealing available
- Military or Aerospace Screening available
