Your supplier of choice for
mmWave Limiters

PMI's mmWave Limiter products offer power handling up to 20 W peak covering the 10 MHz to 50 GHz frequency range. Ideal for instrumentation, aerospace, defense, and radio applications. Custom units can be designed and built to your specifications.

Features:

- Low Insertion Loss
- Fast Recovery
- Low Leakage Levels
- High Peak Power Handling
- 2-IN-1 - Dual Use Connectorized or Surface Mount
- Small Size & Standardized Packaging
- Unique Serial Number and Date Codes with each unit
- Swept Data with each unit, supplied with every delivery

Options:

- Various other limiters available for operations up to 40 GHz
- Surface Mount or Connectorized
- Form, Fit & Function Designs
- Various Connector Option.
- Operating temperature ranges from -64 °C to +95 °C
- Hermetic Sealing available
- Military or Aerospace Screening available
