

## Capacitor Type

# CS4

# CS6

# High Performance MLP Film Capacitor

- Surface-mount capability
- Ideal for high frequency switching power supplies and DC to DC converters
- Low ESR/ESL
- High ripple current/High capacitance
- Operating temperature range: -55°C to 125°C
- Volumetrically efficient
- Made in U.S.A.

### Voltage Ratings Note:

Like all film capacitors, Capstick® capacitors have “true” voltage ratings and, unlike some other dielectric systems, do not require derating to maximize reliability (MTBF) or service life. With FIT rates well under 5 when used at rated voltage, these units make a positive contribution to overall MTBF calculations.

For example, in some dielectric systems, designers may specify a 500 V capacitor for a 370 V input application to provide margin. By contrast, film capacitors are designed to operate fully and reliably at their rated voltage for the life of the equipment. Many leading-edge designs take advantage of this characteristic, using film capacitors at rated voltage to reduce board size and improve performance.

Dimensions in inches, metric (mm) in parenthesis.

Tolerance: K ( $\pm 10\%$ ) standard, J ( $\pm 5\%$ ) available

RoHS part number information

No suffix indicates RoHS-5 compliant standard part number. RoHS-5 product does not contain five of the RoHS banned materials (Hg, CrVI, Cd, PBB and PBDE) in levels exceeding the industry defined limits. Component lead wires are plated with Sn / Pb and match conventional Sn/Pb board assembly requirements.

For a RoHS-6 compliant part, add a -FA suffix. RoHS-6 product does not contain any of the six RoHS banned materials (Hg, CrVI, Cd, PBB, PBDE and Pb) in levels exceeding the industry defined limits. Component lead wires are plated with Sn.
