

AMPG NEWS FLASH – December 1, 2025

AmpliTech (NASDAQ: AMPG) just hit a major milestone.

The Company has officially released its new Band 50 (n50) 5G Open RAN radios and completed the customer field trial tied to its \$78M LOI , which has now increased to over \$100M based on updated deployment forecasts.

Production shipments begin THIS MONTH (Dec 2025).

Multi-year rollout planned through 2026–2027.

Key Highlights

- ◆ Band 50 radios approved for commercial deployment
- ◆ POC successfully completed + ribbon-cutting event
- ◆ Customer increases total expected revenues to \$100M+
- ◆ One of AmpliTech’s largest Open RAN initiatives to date
- ◆ Radios optimized for long-range FWA & rural broadband
- ◆ Fully O-RAN 7.2x interoperable and production-ready

CEO Fawad Maqbool:

“Band 50 is a powerful coverage layer for emerging markets. This milestone validates our Open RAN strategy and opens doors to similar deployments worldwide.”

AmpliTech is now entering full-scale commercial shipment mode, a major execution milestone for the Company’s 5G division.
